

NEW !!!

SOON IN OUR OFFER MULTI-DIODE LASER APPLICATORS

We gladly present our newest range of cluster laser applicators.

Applicators characteristics

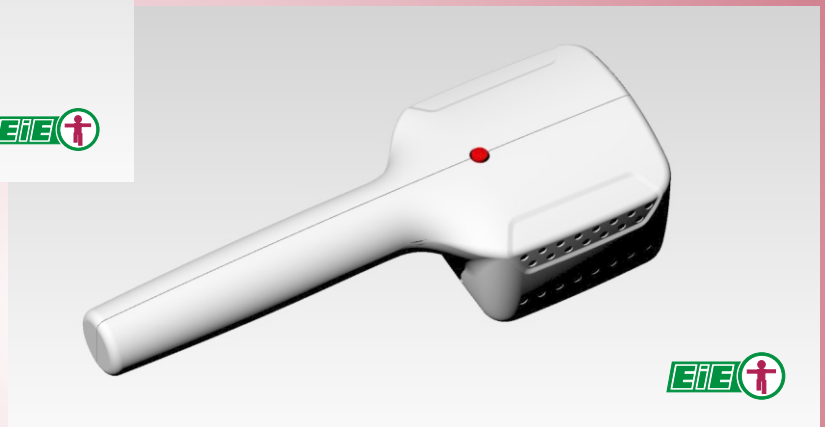

- for easy treatments of larger areas
- holder stands for easier operation
- you can use two wavelengths simultaneously (SP-2 model)
- may be used with all EiE devices with lasertherapy function

Available applicators' models:

SP-1 [red light]

- 9 diodes 660nm / 40mW
- total continuous power 360mW
- effective treatment area 50cm²
- regulated power (9 - 360)mW
- impulse frequency 5-9999Hz

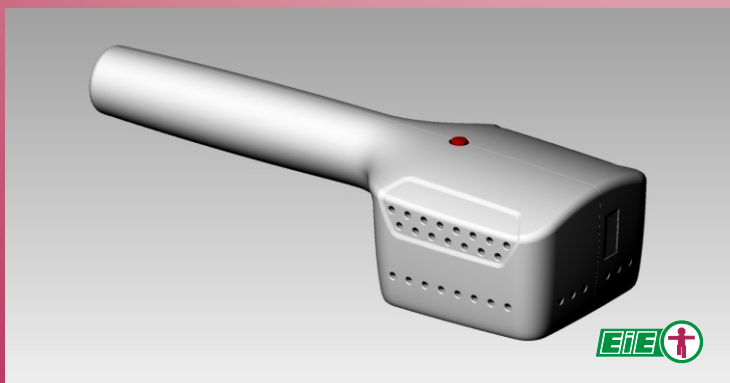

SP-2 [mixed red and infrared light]

- 5 diodes 660nm / 40mW + 4 diodes 808nm / 160mW
- total continuous power 840mW
- effective treatment area 50cm²
- regulated power (9 - 840)mW
- impulse frequency 5-9999Hz

SP-3 [infrared light]

- 9 diodes 808nm / 160mW
- total continuous power 1440mW
- effective treatment area 50cm²
- regulated power (9 - 1440)mW
- impulse frequency 5-9999Hz
